## **Tracsystems to attend Labman 9 Conference in Mankato, Minnesota**

Dallas, Texas (Web Release) April 6, 2008 – Tracsystems a leading provider of [Pharos Uniprint](#) and developer of *TracIT* Transaction System, is pleased to announce that they are a Platinum Sponsor of the 9<sup>th</sup> annual Labman conference hosted at Minnesota State University in Mankato, MN. From June 1-3, 2008.

This conference highlights the needs of lab managers across North America and provides a format for group discussions and product presentations for vendors who focus on products and services for the College and University Campus computer lab environment.

“Tracsystems is more than pleased to help sponsor this event which has been a great assistance to so many existing clients.” says Tracsystems President, Jeffrey Libby. “We have helped save hundreds of thousands of dollars by helping solve Universities print and copy spending problems and look forward to helping others in the future.”

With print management and cost recovery being at the forefront of so many campuses across North America, Tracsystems will be demonstrating Pharos Uniprint Version 8.0 which is scheduled for release on June 2, 2008. They will also have a working prototype of their own *TracIT AddValue Station* and the Pharos [PS150 Omega Terminal](#).

Tracsystems has over 25 years experience in the copy and print management industry and has shown they can help reduce wasted and unwanted printing by 50%-80%, and often times experience a ROI in less than six months.

About **TRACSYSTEMS**, inc.:

Tracsystems, inc. is recognized as a market leader in print, copy and PC management software and hardware to higher education, public libraries, and corporate environments across North America. With over a quarter of a century of experience, we help customers track and control their output management devices maximizing the use and efficiency of current and future devices purchases. This has resulted in hundreds of North American installations benefiting from optimized print & copy environments and a significant reduction of their operating costs.
